# Nathaniel Richards

Software Engineer

## 👤 About

A passionate software engineer that is excited about designing, developing, and shipping production quality technology.

## 💼 Employment History

### Software Developer at MHVillage, Remote
May 2021 — Present

Worked closely on both frontend and backend features. Worked on both new and legacy code using PHP, Angular, and Typescript

### Fullstack Software Engineer at BIGGBY COFFEE, Remote
September 2020 — May 2021

I work on all aspects of technology. From eCommerce web projects to the point of sale systems used by hundreds of stores across the United States every day. In these projects, I have worked on the server-side, the frontend, quality assurance, and more.

### Forklift Driver at Meijer, Fruitport
December 2018 — July 2020

### Team Lead at Lambda School, Remote
June 2020 — September 2020

Led a team of students in after-hour instruction, guidance, homework, and project management.

## 🎓 Education

### Full-Stack Web Development, Lambda School, Remote
January 2020 — September 2020

A Full-Stack web development school teaching front end, back-end, computer science, algorithms, and data structures.

### Computer Science, Yakima Valley Technical Skills Center
September 2016 — August 2018

A STEM program during high school. Education about programming robots, games, and more using C++.

## 📊 Extensive Testing Knowledge

Extensive knowledge in frontend and backend testing using jest enzyme, cypress, Apollo server testing libraries.
